principles and labs for deep learning provides the knowledge and techniques needed to help readers design and develop deep learning models deep learning techniques are introduced through theory comprehensively illustrated explained through the tensorflow source code examples and analyzed through the visualization of results the structured methods and labs provided by dr huang and dr le enable readers to become proficient in tensorflow to build deep convolutional neural networks cnns through custom apis high level keras apis keras applications and tensorflow hub each chapter has one corresponding lab with step by step instruction to help the reader practice and accomplish a specific learning outcome deep learning has been successfully applied in diverse fields such as computer vision audio processing robotics natural language processing bioinformatics and chemistry because of the huge scope of knowledge in deep learning a lot of time is required to understand and deploy useful

working applications hence the importance of this new resource both theory lessons and experiments are included in each chapter to introduce the techniques and provide source code examples to practice using them all labs for this book are placed on github to facilitate the download the book is written based on the assumption that the reader knows basic python for programming and basic machine learning introduces readers to the usefulness of neural networks and deep learning methods provides readers with in depth understanding of the architecture and operation of deep convolutional neural networks demonstrates the visualization needed for designing neural networks provides readers with an in depth understanding of regression problems binary classification problems multi category classification problems variational auto encoder generative adversarial network and object detection

the revised second edition of this respected text provides a state of the art overview of the main topics relating to solid state drives ssds covering nand flash memories memory controllers including booth hardware and software i o interfaces pcie sas sata reliability error correction codes bch and ldpc encryption flash signal processing and hybrid storage updated throughout to include all recent work in the field significant changes for the new edition include a new chapter on flash memory errors and data recovery procedures in ssds for reliability and lifetime improvement updated coverage of ssd architecture and pci express interfaces moving from pcie gen3 to pcie gen4 and including a section on nvme over fabric nvme an additional section on 3d flash memories an update on standard reliability procedures for ssds expanded coverage of bch for ssds with a specific section on detection a new section on non binary low density parity check ldpc codes the most recent advancement in the field a description of randomization in the protection of ssd data against attacks particularly relevant to 3d architectures the ssd market is booming with many industries placing a huge effort in this space spending billions of dollars in r d and product development moreover flash manufacturers are now moving to 3d architectures thus enabling an even higher level of storage capacity this book takes the reader through the fundamentals and brings them up to speed with the most recent developments in the field and is suitable for advanced students researchers and engineers alike

the four volume set lncs 11256 11257 11258 and 11259 constitutes the refereed proceedings of the first chinese conference on pattern recognition and computer vision prcv 2018 held in guangzhou china in november 2018 the 179 revised full papers presented were carefully reviewed and selected from 399 submissions the papers have been organized in the following topical sections part i biometrics computer vision application part ii deep learning part iii document analysis face recognition and analysis feature extraction and selection machine learning part iv object detection and tracking performance evaluation and database remote sensing
